PROFESSIONAL PROFILE

Multidisciplinary digital specialist and founder of NONSTOP AI (a trading name), building practical systems that automate operations, manage communications and generate enquiries. Hands-on experience with AI receptionists, workflow automation, B2B lead generation and email outreach systems, website development, Meta Ads, social media management, content creation and video editing. Self-directed, project-based experience supported by professional online training. Open to freelance, contract, remote and permanent roles.

CORE SKILLS

AI automation & voice agents: AI receptionists and inbound call handling (Bland AI, Twilio), conversation design, caller lookup and structured enquiry capture, n8n and Make workflows, API and webhook integrations, error handling.

B2B lead generation & outreach: prospect sourcing (Apify, Google Maps and Places data), segmentation and scoring, Companies House matching, TPS/CTPS screening and suppression, email outreach with automated follow-ups (n8n, Gmail API), lead tracking and reporting in Supabase.

Website development: responsive business sites and landing pages (React, Vite, Tailwind CSS, Astro) with enquiry and payment-link flows, serverless functions, Netlify and GitHub deployment.

Digital marketing & Meta Ads: campaign and ad-set structure, Meta Pixel and Conversions API tracking, Meta Graph API automation with approval-gated writes, short-form video ad creative, conversion-focused landing pages.

Social media & content creation: Instagram carousels, Reels and Stories, content calendars and call-to-action frameworks, publishing automation (n8n, Buffer), video editing (CapCut) and AI video tools (HeyGen, Runway), graphic design.

Operations & data: Supabase and PostgreSQL (schemas, RPCs, Edge Functions, scheduled jobs), Google Workspace integrations, health checks and reporting, testing against execution logs. AI-assisted development with Claude, directed and verified.

RELEVANT EXPERIENCE

Founder / AI Automation Builder | **NONSTOP AI** (trading name) | From May 2024 | Self-directed projects

- Designed and operate an email outreach system covering lead sourcing, qualification, scheduled sending, follow-ups, lead tracking and reporting.
- Built and tested an AI receptionist that answers calls, recognises callers and captures structured enquiries into a database.
- Built website templates and landing pages with enquiry capture, deployed on Netlify; reused one backend across niche offers.
- Structured Meta Ads campaigns and built conversion tracking and campaign-data automation.
- Produce and automate social content: Reels, Stories and carousels, with publishing workflows and short-form video editing.
- Investigate failures using execution histories and database queries, and document what is live and what is only tested.

SELECTED PROJECTS

Email Automation Engine | Internal system. n8n and Supabase outreach: B2B lead sourcing, scheduled email, automated follow-ups, lead tracking and daily reporting, with suppression and compliance checks.

AI Receptionist | Tested implementation. Bland AI voice agent on a Twilio number with caller lookup (Supabase Edge Functions) and enquiry capture through n8n. Tested, not a paid-client deployment.

Website Machine | Live pages. Template system for fast one-page business websites with built-in enquiry capture (React, Vite, Tailwind, Netlify).

Social Media Content Automation | Internal system. n8n workflows publishing Reels, Stories and carousels across Instagram, Facebook and LinkedIn from a reusable asset bank.

No sales, client revenue or performance results are claimed for any project.

TRAINING

The Real World | Online professional training in AI automation, e-commerce, social media management and content creation | 2023 – present. Professional online training, not an accredited university degree.
